Peter Borman
Tim Kirk
Ken Schultz
Don Whalen

Absent

Suad Maow

Also Present

Mike Maher, Parks and Recreation Director
Rachel Workin, Environmental Planner

Approve Parks & Recreation Commission Agenda for April 1, 2024

Motion by Commissioner Kirk to approve the April 1, 2024 meeting agenda. Seconded by Commissioner Graham. The motion passed unanimously.

Approve Parks & Recreation Commission Minutes for February 5, 2024

Motion by Commissioner Cardona to approve the February 5, 2024 meeting minutes. Seconded by Commissioner Schultz. The motion passed unanimously.

Open Forum

New Business

1. Sylvan Hills Park Stormwater and Habitat Improvements

Rachel Workin, Environmental Planner, provided background information on the project noting the park project planned for this year. She provided additional details on the stormwater elements of the park, the existing conditions, and prior incidents. She provided details of the feasibility study completed by the WMO, the City and the consultants which reviewed multiple concepts. She presented the concept which provides a balance between underground and surface water features to manage stormwater. She stated that the WMO awarded \$1,493,000 at its March 12th meeting for the stormwater project. The City is asked to provide a \$15,000 contribution. She noted that the City Council will consider this project at its April 8th meeting and if approved, the project is planned for construction in the fall of 2024.

Commissioner Whalen asked for details on maintenance. Ms. Workin commented that \$50,000 of the budget from the WMO can be used for native habitat maintenance over the next three years to ensure success in establishing that habitat. She stated that the City would be responsible for ongoing maintenance of the underground stormwater facility.

Chair Borman asked if the stormwater treatment would collect runoff from the neighborhood. Ms. Workin commented that the plan would balance above ground water treatment that would collect water from the immediate area, while the underground facility would collect water diverted from the stormwater system to treat water and infiltrate that into the ground. She commented that these combined methods of treatment would be estimated to remove 5,000 pounds of sediment from runoff each year, as well as additional phosphorus removal that would be provided, prior to the water discharging into the Mississippi River.

Commissioner Kirk asked the anticipated lifespan of the underground structure. Ms. Workin commented that the maintenance needs would depend on the quality of the stormwater reaching the park. She stated that there will be a pretreatment element to collect leaves and debris, but finer particulates will reach the underground facility. She noted a similar underground facility the City uses which is vacuumed every three to five years. She believed that the facility has a useful life expectancy of 25 to 30 years.

Motion by Commissioner Whalen to endorse the modified Sylvan Hills Concept Plan. Seconded by Commissioner Kirk. The motion passed unanimously.

2. City of Fridley Park Bench Sponsorship Guidelines

Mike Maher, Parks and Recreation Director, reviewed the purpose of a park bench sponsorship program. He stated that these draft guidelines and program used the Springbrook Nature Center program as a model to expand upon. He reviewed the proposed program details and typical bench types for the different types of parks.

Chair Borman asked if Springbrook Nature Center has reached the capacity for benches. Mr. Maher confirmed that there are currently 28 benches at that location, all of which have been sponsored.

Motion by Commissioner Cardona to approve the park bench sponsorship program and guidelines. Seconded by Commissioner Graham. The motion passed unanimously.

Old Business

Staff Reports

3. Springbrook Nature Center Report

Mr. Maher provided an overview of the report noting the upcoming Springbrook Spree fundraiser on Saturday, April 6th. He also highlighted information on partnerships with the schools, a grant received and registration status for summer day camps.

4. Fridley Parks and Recreation Division Report

Mr. Maher provided a summary of the written report, noting that the department is hiring for the summer season. He stated that the Summer ROCKS program is at full capacity and there will be new programming at two park locations. He also provided details on a robust offering of adult athletic leagues and fitness classes and noted that performers have been booked for the community concert series.

5. Park Maintenance and Construction Report

Mr. Maher reviewed his written report.

Unfinished Business

Adjournment

Commissioner Kirk made the motion to adjourn the meeting at 7:47 p.m. Seconded by Commissioner Graham. The motion passed unanimously.

Respectfully submitted,

Amanda Staple
Recording Secretary

AGENDA REPORT

Meeting Date: May 6, 2024

Meeting Type: Parks and Recreation Commission

Title

Rice Creek West Regional Trail Corridor Master Plan Update

Background

Anoka County Parks Planner Karen Blaska will present an updated long-range plan for the Rice Creek West Regional Trail. Four miles of the Rice Creek West Regional Trail run through the City of Fridley connecting Manomin Park, Locke Lake Park, Plaza Park, Community Park, and Locke Park. The Regional Trail and several parks were operated under a Joint Powers Agreement between Anoka County and The City of Fridley. This agreement was terminated by the City of Fridley in November of 2022. The City of Fridley and Anoka County plan for an easement to be granted for the Regional Trail and for trail maintenance and planning to remain a function of Anoka County Parks.

Anoka County had completed a community engagement process to gather feedback on the Rice Creek West Regional Trail Corridor and wishes to share the proposed final long-range plan to the City and seeks a resolution of support from the Fridley City Council.

Financial Impact

The City of Fridley will assume operational oversight of Locke Lake Park, Plaza Park, and Locke Park as well as the sections of regional trail running through these parks.

Recommendation

Staff requests that the Commission recommend approval of the proposed Rice Creek West Regional Trail Long Range Plan to the Fridley City Council.

Attachments and Other Resources

- Finalized RCWRT LR Plan with Appendix

Vision Statement

We believe Fridley will be a safe, vibrant, friendly and stable home for families and businesses.

RICE CREEK WEST REGIONAL TRAIL

2024 | [ANOKACOUNTYPARKS.COM](https://anokacountyparks.com)

**ANOKA
COUNTY**
P A R K S

Introduction

Regional Context

The Rice Creek West Regional Trail is an important amenity in the metropolitan regional area because it provides access to Rice Creek, which is a 28-mile scenic creek that travels through the Cities of Columbus, Lino Lakes, Circle Pines, Shoreview, Arden Hills, New Brighton, and Fridley to the Mississippi River.

In the late 1970's and early 1980's, Anoka and Ramsey Counties partnered to develop a 14-mile-long trail along the creek from Lino Lakes to the Mississippi River. The trail was built in the mid-1980's and the regional trail is divided into two sections. One section is from the Mississippi River to Long Lake Regional Park in Ramsey County and is known as Rice Creek West Regional Trail. The other section of trail travels north from Long Lake Regional Park to Lino Lakes and is known as Rice Creek North Regional Trail.

The purpose of this long-range plan is to address the portion of Rice Creek West Regional Trail within Anoka County and the City of Fridley.

Mississippi River Corridor Critical Area

A portion of the Rice Creek West Regional Trail Corridor does fall within the Mississippi River Corridor Critical Area (MRCCA). The MRCCA is a state, regional and local government program that provides coordinated land planning and regulation for the 72-mile stretch of the Mississippi River through the seven-county metropolitan area. It covers 54,000 acres of land in 30 local jurisdictions and is made of several MRCCA Districts. The purpose of MRCCA is to:

1. Protect and preserve the Mississippi River and adjacent lands that the legislature finds to be unique and valuable state and regional resources for the benefit of the health, safety, and welfare of the citizens of the state, region, and nation.

2. Prevent and mitigate irreversible damages to these state, regional, and natural resources.
3. Preserve and enhance the natural, aesthetic, cultural, and historical values of the Mississippi River and adjacent lands for public use and benefit.
4. Protect and preserve the Mississippi River as an essential element in the national, state, and regional transportation, sewer and water, and recreational systems.
5. Protect and preserve the biological and ecological functions of the Mississippi River corridor.

MRCCA Boundary

The western most terminus for the Rice Creek West Regional Trail is Manomin Park. This park is within the River Neighborhood District with the City of Fridley enforcing the MRCCA zoning requirements. The County acknowledges the standards and criteria for the preservation, protection, and management of the MRCCA.

MISSISSIPPI R

RICE CREEK WEST REGIONAL TRAIL
SEGMENT 1 - MANOMIN PARK
MISSISSIPPI RIVER CORRIDOR CRITICAL AREA

Manomin Park within MRCCA

The County also recognizes that the design and construction of park and trail facilities must comply with MRCCA standards as set forth in Minn. Rules 6106.0130 and that any planning, design and construction of facilities or projects in this area will need to protect primary conservation areas and public river corridor views as identified by the Cities of Fridley, Brooklyn Park, and Anoka County.

Local Context

Located in the City of Fridley, a first ring suburb, the trail follows the Rice Creek to the confluence at the Mississippi River. The trail is approximately 4 miles long and connects Anoka and Ramsey counties. It also provides connections to other regional parks and trails, like the Mississippi River Trail, Long Lake Regional Park, and local parks, such as Community Park in Fridley. The trail provides an important transportation alternative to driving by connecting where people live, work, and recreate.

Public input regarding the trail indicated that the trail is highly important for the access to nature, wildlife, recreation, and transportation opportunities it provides. Many that use the trail noted its location as being key for use, as it connects to several different types of

residential housing. One participant described it as being “away from the city” but still “in the city”.

Regional Context

The original long-range plan for the trail dates to 1980. While there was a plan amendment completed in 2010, the Rice Creek West Regional Trail Corridor trail has not been reviewed since. This report is intended to update the long-range plan for the trail to meet the needs of changing populations and demographics in the metropolitan area.

Since the trail traverses through Anoka County and City of Fridley property, the two agencies previously partnered through a Joint Powers Agreement (JPA) to offer this amenity to the residents in the north

metro area. In November 2022, the City of Fridley terminated the JPA. To ensure grant compliance and the regional trail status, the Metropolitan Council and State of MN have agreed to allow the City of Fridley to become co-grantees with Anoka County on the existing grants that provided bond funding for the park redevelopment. This will allow the City to be responsible for the operations and maintenance of the park, but maintain State compliance with the grants. The City will grant a trail easement for the regional trail and the County will be responsible for the operations and maintenance of the regional trail through City of Fridley property. This plan addresses the regional trail needs, operation and maintenance moving forward.

As shown in the following figure, the easternmost portion of the trail corridor, from Highway 65/Central Avenue to Stinson Boulevard (Ramsey County border) is owned and operated by Anoka County. The 95 acres that make up Locke Park, located in the middle section of the trail, is owned by the City of Fridley. West of Locke Park the trail traverses land owned by the County at Community Park and land owned and operated by the City of Fridley at Plaza and Locke Lake Parks. Trail easements have been provided by the City of Fridley to ensure the integrity of the trail across city property. The trail is on-street on Rice Creek Way NE and then on a sidewalk adjacent to East River Road for a short segment before it terminates at Manomin Park, which is owned and operated by the County.

Rice Creek Water Trail

The designated Rice Creek Water Trail is a 15-mile water trail that originates at the outlet of Peltier Lake in Lino Lakes, below the Peltier Lake Dam, and flows approximately 15 miles downstream and terminates at Long Lake Regional Park in New Brighton. The 5 ¼ mile section of Rice Creek that flows through Fridley, between Long Lake and the Mississippi River, cannot be safely and officially designated as a water trail due to consistent public safety issues associated with multiple downed trees in the creek that present public safety hazards for watercraft users. However, the Anoka County Parks Department conducts an annual inspection of downed trees in the Fridley section of the creek, maps the locations, and attempts to remove the identified hazards as resources are available and when stream flows

are safe for water certified chainsaw crews. Certified chainsaw crews have not been available since 2018/19 due to declining staffing shortages at the Conservation Corps Minnesota. Also, stream access to many areas throughout this corridor is hindered by private properties, challenging topography, downed trees, and safely navigable stream flows. Anoka County's Risk Management Department does not support an official designation of a water trail in this portion of the Rice Creek and therefore the County does not encourage public use of the creek, thus the Rice Creek Water Trail through the City of Fridley is not considered part of the Rice Creek West Regional Trail Corridor and not considered in the Long-Range Plan.

Boundaries/Development Concept

The existing four-mile-long Rice Creek West Regional Trail corridor follows the creek through Anoka County. Locke Park, the Fridley Civic Campus, Community Park, Plaza Park, Locke Lake Park and Manomin Park are a few parks and facilities it connects. The trail also links Rice Creek, the Mississippi River, the Mississippi River Trail, Rice Creek West Regional Trail in Ramsey County, and many residential neighborhoods along its route.

For the purposes of discussion, the trail is divided into six segments from west to east. The segments are as follows:

The trail is already established and the boundaries of the trail corridor are shown in each of the following segments. There are no acquisition parcels proposed within this long range plan and trail easements are discussed segment by segment. There are no active Minnesota Pollution Control Agency monitor sites within the corridor and the corridor is quite suitable for a regional trail as it provides varied topography and varied land cover for a variety of experiences along the trail.

SEGMENT 1

Boundaries of Segment 1

Segment 1 focuses on the westernmost terminus for the Rice Creek West Regional Trail at Manomin Park, which is owned and operated by Anoka County. Manomin Park is approximately 14 acres and sits at the confluence of the Mississippi River and Rice Creek. The park has a historic property, the Banfill Locke Historic House, two parking lots for 40 cars, park trails, a 50-person capacity gazebo for rent, a restroom building, fishing deck and canoe and kayak launch at Locke Lake, as shown in the adjacent map. To provide access from the park to the regional trail, there is an existing pedestrian underpass that provides a safe alternative to crossing East River Road/CSAH 1. The existing regional trail is an 8-foot-wide paved trail within Manomin Park.

The land cover of the park varies from floodplain forest to upland with short perennial grasses and mixed deciduous trees. Since the County owns and operates the 14-acre park, the site suitability for parkland is excellent and provides access to Locke Lake, Rice Creek, and the Mississippi River. There are no acquisition costs related to the trail within Segment 1.

Development Concept for Segment 1

While the park serves has a trailhead location and has parking, a newly rebuilt restroom building and access to drinking water; the remaining facilities and amenities need redevelopment or replacement.

One of the unique features of Manomin Park is the Banfill Locke Historic House, which is a 175-year-old house that is on the National Register of Historic Places. Recognized as one of the oldest structures with Greek Revival style architecture in Anoka County; the house was built in 1847, two years before Minnesota became a territory in 1849.

Banfill Locke House has been a community asset, previously providing space for an art center for more than 30 years. The Art Center moved to a different location, which provided a unique opportunity to renovate the building to ensure its use as a historic community space for the future. Through this amendment, the County is proposing this structure serve as a

staffed Visitor Center and Trailhead Facility for Rice Creek West Regional Trail, which typically has more than 300,000 visitors per year.

The building does need improvements to ensure the structural integrity and energy efficiency of the building envelope, as well as updates to accommodate the new trailhead use. Due to the age of the building, there are foundation issues that will need to be addressed before the siding, roof, windows and doors can be replaced. Interior renovations will be required to accommodate staff and make it a more inviting public building. Most of the building work is anticipated to be completed in the next few years depending on available funding.

Public engagement has shown that there's an appetite for outdoor recreation rental equipment at this location; therefore, Anoka County is proposing to have equipment such as snowshoes and fishing equipment for rental use. The rental program can be expanded as needed based on additional public feedback.

Other proposed improvements to the park include reconstruction of the two parking lots, and trail and bridge improvements and/or reconstruction. A portion of the trails need to be reconfigured and improved for access. The two existing pedestrian bridges providing access to Rice Creek and the Mississippi River are in relatively good condition and under normal weather/water conditions, it is estimated that they would not need to be replaced for approximately 15-20 years. The bridge decking is anticipated to be replaced sooner. In addition, public engagement showed that there's a desire for an accessible trail to the Mississippi River. Currently the trail loop on the north side of the creek is aggregate, so the County is proposing to pave a bituminous trail for access to the river and to create shore fishing opportunities when the bridges are replaced. Since the current bridges are not rated

for heavy construction traffic, this construction would entail creating a temporary land bridge across an oxbow of the creek.

The 50-person capacity metal gazebo is in relatively good condition and will only require a new roof in 5-10 years. With the roof replacement, the County would also improve lighting throughout the park. Other improvements include reconstruction of the fishing deck and canoe/kayak take out structure in the same timeframe as the gazebo roof.

Natural resource management work will include continued buckthorn suppression, reseeding with natives where buckthorn was removed, continued removal of Emerald Ash Borer hazard trees, and continued planting of diverse species of shade trees.

SEGMENT 2

Boundaries for Segment 2

From Manomin Park and utilizing the East River Road pedestrian underpass, the trail travels south on East River Road, back over Rice Creek on an existing 12' sidewalk on the east side, to Rice Creek Way. At the intersection of Rice Creek Way and East River Road, the trail is routed on street following Rice Creek Way to Locke Lake Park, which is owned and operated by the City of Fridley. The trail easements granted from the City of Fridley to Anoka County will ensure the regional trail route is maintained through the city park. From there, the trail travels east under the BNSF railroad and heads south for about 200'. This section of paved trail is 8 feet wide and within the BNSF railroad right of way where space is limited. The County has a limited use agreement with the railroad for the trail and operates and maintains the trail through the railroad right of way. At this point there is a short city connector trail for access to the residents and businesses south of the trail. After a sharp U-turn, the trail travels north over Rice Creek again and through the City of Fridley's Plaza Park.

The land cover through this segment is mostly impervious surface because of the railway, but the Locke Lake Park parcel consists of maintained turf grass with mixed coniferous and deciduous trees. The park provides an access to Locke Lake.

Development Concept for Segment 2

Since most of the trail is on street or sidewalk, the development concept for the trail is relatively simple. The priority would be to work with the City of Fridley to ensure that signage and wayfinding for the trail through this segment is clear and easily understood. Through the City park and Railroad Right of Way, the trail will need to be reconstructed and slope reduced for access as shown in the following map. Temporary easements will be required for trail reconstruction and the trail alignments may be realigned to accommodate

accessibility. New legal descriptions will be determined and updated for the required trail easements.

SEGMENT 3

Boundaries for Segment 3

Segment 3 covers the trail heading north from Rice Creek to and through Plaza Park and Community Park. The north/south segment of the trail is 12 feet wide to allow access for railroad and watershed district maintenance purposes. It travels north along the western fence line for Plaza Park, which is owned by the City of Fridley. Trail easements will ensure the regional trail is maintained through city property. North of Plaza Park the paved trail becomes 8 feet wide and is within the Anoka County owned and operated portion of

Community Park. Within Community Park, the trail travels around a pond and connects to the University Avenue (State Highway 47) and the University Service Road intersection.

The existing trail at University Avenue has an at-grade signalized crossing of a high-speed road. To provide a safe alternative to that crossing, the County is proposing to construct a pedestrian tunnel under University Avenue about 300'-400' south of the intersection with 10' wide paved trails connecting to the existing trail. The proposed work will need to occur within the road right of way, so planning and construction of the tunnel will involve the MN Department of Transportation and the County Transportation Division. It is assumed a trail easement, Right of Entry Agreement, or some other form of contract will be required to install the new trails and tunnel in accordance with MnDOT standards. The cost of a permanent easement from the state is estimated to be about \$0- \$55,000.

From the road intersection, the 10' wide paved trail follows north and east behind curb of the University East Service Road and then east on the south side of Locke Parkway. This section of regional trail is covered by a trail easement granted to the County from the City.

Land cover through this segment is mostly mowed turf immediately adjacent to the trail. Within Community Park, a native prairie has been planted and is currently maintained.

Development Concept for Segment 3

The development concept of Segment 3 consists mostly of trail reconstruction and softening the curves for safety and sight lines as well as increasing the trail to a 10' width in locations where the existing trail is currently 8' wide. In addition, the County is proposing to increase the turning radii of the trail around the pond for safety and access purposes. The east/west approach from the pond to State Highway 47/University Avenue is proposed to be regraded and straightened for safety and to reduce grades for access. Prior to the intersection, the regional trail will veer south about 400 feet to a proposed pedestrian tunnel or bridge for safe crossing of a high-speed road. It is anticipated that the tunnel or bridge will be 10' or 12' wide, although the exact design has yet to be determined. Exiting out of the pedestrian tunnel/bridge, the trail will then head north to connect back up to the existing trail route. The existing segment of trail along 69th Avenue will need to be reconstructed and grades adjusted to allow better access.

From there, the trail follows behind curb along the south side of Locke Parkway to Locke Park. This trail is a 10' wide paved trail that is currently in good condition as it is only about 3 years old. This segment from University to Locke Park has an easement over it in favor of Anoka County for regional trail purposes.

Natural resource management with Segment 3 will continue with prairie restoration best management practices, such as prescribed burning, removal of invasive woody plant species and additional native seeding.

Segment 4

Boundaries for Segment 4

Segment 4 continues along Locke Parkway to Locke Park. Locke Park consists of approximately 95 acres north and south of Rice Creek, which is owned by the City of Fridley. The existing 10' wide paved regional trail traverses through the park. From there the trail travels southeast to an existing pedestrian tunnel that was installed in 1999. The regional trail through Locke Park is covered under an easement granted from City to County for regional trail purposes.

Locke Park provides many amenities for trail users, such as playgrounds, a small and large size shelter, a dog park, a restroom building and additional paved trails and natural surface trails. Amenities in the park were built using State Bond funds and as such must be operated and maintained in accordance with the Met Council grant agreements and State bond funding requirements for 125% of the useful life of the facilities, which is estimated to be 18.75 years.

The active use areas are mostly maintained turf with scattered deciduous trees. There are some native prairie plantings along the roadway and the more natural areas of the park include Oak Forests, Altered Deciduous Forest and temporarily flooded altered deciduous forests, which makes the site suitability for a regional trail excellent.

Development Concept for Segment 4

Anoka County is responsible for the regional trail that traverses the park and will have permanent trail easements over the trail to provide access for operations and maintenance. The development concept for Segment 4 provides for the reconstruction of the trail and lessening of slopes to provide greater ADA accessibility. Those trail improvements are scheduled to be completed within 3-5 years, as shown in the Appendix. The City will be responsible for the other trails and amenities within Locke Park. The regional trail pedestrian

bridge will need to be replaced as well, but that is not anticipated to occur for 10-15 years. The Watershed District advises that there are unusual drainage and seepage patterns in the northeast corner of the park and any design for reconstruction should take those factors into

account and avoid routing surface water to the creek bank to ensure its stability. Other improvements through this segment include additional wayfinding and directional signage along the trail.

Segment 5

Boundaries for Segment 5

Segment 5 of the trail goes under Highway 65 through an existing pedestrian tunnel and continues east to County State Aid Highway (CSAH) 35. The trail is a 10' wide paved trail with an 8' wide, 600' long paved connector trail on the east side of State Highway 65 that provides access to the trail for neighborhoods to the south of the trail. The trail crosses over Rice Creek via a pedestrian bridge and currently crosses at grade at the signalized intersection of CSAH 35 and 69th Avenue. The trail then follows on the east side of CSAH 35 south until it traverses east back into the natural area of the creek.

This section of trail crosses through altered temporarily flooded deciduous forest and oak forest making the trail an aesthetically pleasing experience.

There are proposed changes to the trail in this section as discussed in the Development Concept, but those changes occur within the County owned land or right of way. No easements will be required for this segment. The trail corridor in Segment 5 is owned and operated by Anoka County.

Development Concept for Segment 5

The development concept for Segment 5 includes improving the existing pedestrian tunnel through resurfacing, improving drainage, and increasing lighting efficiency. The trail is proposed to be reconstructed to lessen slopes and increase accessibility. Sight lines and safety are an issue on some sharp curves, and in those locations the trail is proposed to be realigned to improve safety and visibility. The trail crosses the Rice Creek with a pedestrian bridge that will eventually need to be replaced and the County is proposing to construct a natural surface trail to offer a different hiking experience in the corridor. Also planned are a few nodes or stopping points for visual and/or physical access to the creek.

A major improvement planned for the trail through this segment is a pedestrian tunnel or bridge underpass to allow safe passage under CSAH 35. The tunnel or bridge underpass is anticipated to serve two purposes. First, it will eliminate the steep slopes involved in getting to and from the existing intersection, which is a grade change of approximately 30 feet. Secondly, it will create a safe crossing under the county highway. Adding the tunnel or bridge underpass will eliminate vehicle conflicts and allow for better trail accessibility. The 30' steep

slope is proposed to be addressed through reconstruction of the trail that includes several switchbacks that meet or exceed accessibility requirements.

From the tunnel or bridge underpass, the trail will continue east as discussed in Segment 6.

Natural resource management for Segments 5 and 6 will include continued buckthorn suppression, removal of Emerald Ash Borer hazard trees, removal of other invasive woody plant species with replanting of native species appropriate for the habitat.

Segment 6

Boundaries for Segment 6

From the proposed CSAH 35 tunnel or bridge crossing, the trail traverses east along the north side of the creek. The existing paved trail is 8' wide, but the County is proposing to increase the width to 10' when the trail is reconstructed. There is one connector trail within this segment, that heads north and connects to an existing parking lot off 69th Avenue that is proposed to be removed and reconstructed as part of a new proposed trailhead facility. The existing trail is approximately 900' long by 8' wide and is owned and operated by Anoka County. A second 8' wide paved connector trail is on the eastern end of the trail. Both of these trails are anticipated to be widened to 10' when reconstructed. As the regional trail heads north to connect to Ramsey County's Rice Creek West Regional Trail, a second connector trail heads south, crossing the creek to provide an access to the residential area south of the creek. This trail is approximately 800' long and 8' wide and will be owned and operated by the City of Fridley.

The land cover through this segment is altered. Closest to the creek is the temporarily flooded deciduous forest and as the trail moves away from the creek, the land cover is altered deciduous forest, and deciduous woodland. This type of land cover makes the site very suitable for park and trail purposes. There are no MPCA actively monitored sites within the trail corridor.

There is one .1-acre parcel, #13-30-24-14-0044, that is proposed to be removed from the trail corridor boundary. The parcel is cut off from the trail corridor by City right of way and has become a maintenance nuisance from people dumping their waste on the site. Therefore, through this plan, the County is proposing the parcel be removed from the boundary as it does not serve a regional trail purpose. The County would dispose of the property with any proceeds incurred going back into the regional trail corridor development. The 2024 assessed value of the property is \$8,600. No Council/State dollars have been used on this parcel.

Anoka County will continue to own and operate the trail corridor and land through this segment.

Development Concept for Segment 6

The development concept for Segment 6 includes the reconstruction of the trail to lessen slope grades, widen the trail to 10' and improve accessibility. Sight lines and safety are an issue in some areas of the trail through this segment, so the County is proposing to realign the trail to reduce the sharp curves and provide better visibility. This will also help improve the biking experience through this section.

The County is also proposing to relocate and reconstruct the existing parking lot, with a 20-25 stall capacity, off 69th Avenue along with construction of a new restroom building and trailhead facility with drinking water available. This will support use of the regional trail and will support the County's proposed four-mile-long single-track trail. Public engagement on the long-range plan showed there is demand for a single-track trail in the area. The intent of the trail is to provide a nice easy family-friendly ride, but also offer certain challenges that more experienced riders can choose to experience if they desire. The City of Fridley has some safety concerns with this area and has requested that improvements include gates to restrict access to the parking area after closing, security cameras, lights and emergency telephone connections. The County has incorporated these improvements into these plans.

Also planned are two or three nodes or stopping points for visual and/or physical access to the creek.

The map below illustrates the entire proposed trail alignment once fully reconstructed.

Natural Resources along Trail Corridor

As part of the long-range planning process, the existing natural resources within the trail corridor have been examined and conflicts between the trail and the natural resources in the area have been minimized through the planning process. Anoka County maintains a strong commitment to preserving and restoring natural resources within its park, trails, and open space system. The expansive 11,000-acre park system contains a diverse system of wildlife species and natural areas including upland forests, deciduous woodlands, upland prairies, forested wetlands, shrub wetlands and open wetlands. The existing land cover, consistent with the Minnesota Land Cover Classification System, can be found in the Appendix of this document. There are no sites of significant biological diversity, nor any listed species known to be within the trail corridor. To manage the natural resources and maintain the parks and trail's identity, Anoka County will provide for:

- The protection, restoration, and enhancement of native plant and animal habitats throughout the park.
- Protection and improvement of water and soil resources.
- Increase public awareness regarding the diverse natural resources in the area.
- Implement sustainable practices related to park development, operations, and maintenance.

Prairie in park

General natural resources management strategies include identifying and assessing remnant plant and animal communities, monitoring rare species, controlling invasive species, ecologically restoring native plant and animal habitat, controlling detrimental insects and disease, wildlife management, enhancing water quality, erosion control and cooperative land stewardship.

A sustainable development framework is utilized in all new park and trail development and redevelopment to ensure ecologically sound land stewardship with an emphasis on maintaining the longevity of the facilities for public benefit.

The following natural resource management components are an integral part of Anoka County's planning efforts associated with the redevelopment of Rice Creek West Regional Trail Corridor:

Anoka County's Natural Resources Unit will be directly involved with the design, construction, and monitoring of the proposed park projects. A concerted emphasis will be placed on avoiding and minimizing any adverse impacts to the plant and animal habitat, as well as to the creek and wetlands. In addition, Anoka County will focus on incorporating local native seed and plant material that will complement the ecology and function of the surrounding native plant communities.

Protection of the creek, wetlands and surface water resources will be a top priority for projects outlined in the development concept as Rice Creek is an impaired water.

Anoka County will work very closely with the Rice Creek Watershed District, the City of Fridley, the Minnesota Department of Natural Resources, the Minnesota Pollution Control Agency (MPCA), and the Metropolitan Council to ensure that the standards and requirements for resource protection are met as these projects proceed. Stormwater management within the park is typically managed on site through vegetated swales and infiltration basins. The County utilizes MPCA's best management practice recommendations in the design and incorporation of storm water pollutant and runoff flow reduction measures constructed in conjunction with park improvements.

Rice Creek is an important water resource

The MPCA best management practices guidance documents can be found at: [Guidance for construction stormwater | Minnesota Pollution Control Agency \(state.mn.us\)](https://www.mn.gov/guidance-for-construction-stormwater-minnesota-pollution-control-agency-state.mn.us). The County also has been working with the Minnesota Department of Natural Resources on an annual basis through a Delegation Agreement to provide aquatic invasive species (AIS) prevention through inspections of water-related equipment. The County currently has 41 public access points that it monitors through this program. The program provides funds to staff launches on a random basis to ensure boat owners are complying with the state laws and regulations as related to AIS. While there are no access points to the creek through the City of Fridley, the County will be providing education information at certain points along the creek and trail regarding aquatic invasive species best management practices.

The overall vegetation management goal for Anoka County is to identify restoration needs and to define and implement adaptive management strategies that will sustain the biological diversity, production, and function of native plant communities. Vegetation management within the park will focus on preserving native plants, introducing local native plants, eradicating invasive species, maintaining water quality within the watershed, and providing for plant and wildlife corridor connections.

Considering that ecosystems are dynamic and continually changing over time and space, an adaptive management approach and framework fits very well with the County's practice of ecological restoration and stewardship. In the context of ecological restoration, the following adaptive management principles will guide the stewardship plan for Rice Creek West Regional Trail Corridor:

- **Problem Assessment:**

Define the scope of degradation to the site, synthesize the existing knowledge about it, and explore the potential outcomes of alternative restoration actions.

- **Design:**

Design a restoration plan and monitoring program that will provide reliable feedback and information about the effectiveness of restoration methods.

- **Implementation:**

Effective restoration is usually a multi-step process, requiring not only installation, but many years of maintenance and monitoring.

- **Monitoring:**

Biological indicators are monitored to determine how effective the restoration methods are in meeting the project objectives.

- **Evaluation:**

The actual outcomes are compared to the anticipated outcomes. In addition, the reasons for the underlying differences are interpreted.

- **Adjustment:**

Practices, objectives, and models used during the restoration process may lead to assessment of the problem, new questions, and new options to try in a continual cycle of improvement for a given project.

Management and stewardship practices for natural resources maintenance in the park will include periodic mowing, prescriptive fire management, invasive species surveys, hazard tree assessments, seed collection and propagation, invasive species removal, turf management, brush and tree maintenance, erosion control, forest health assessments and maintenance, wildlife surveys and management as needed, and interpretive signage.

Seed Collection

Maintenance and stewardship practices also include regular pruning of trees and vegetation along roadways, trail corridors, park facilities and structures.

Priority projects for natural resources within the trail corridor will focus on the following native community restorations:

1. Mesic Prairie
2. Higher Quality Woodlands
3. Higher Quality Riparian Areas

These projects will be conducted in an on-going basis with an average annual cost of \$15,000.

Wayfinding along Trail Corridor

The wayfinding signage plan for the trail will provide the public with orientation and location information to access amenities and services within along the trail. Wayfinding typically includes the following:

Trailhead Signs

These types of signs are provided at trailhead locations where parking lots and restrooms are provided. These signs give park patrons a view of the overall park or trail, amenities, and local trails that can be accessed from the location. These signs also include the standard hours, rules, and etiquette reminders.

Intersection Sign

Intersection/Directional Signs

These types of signs are located at intersections where a decision is to be made. They provide much of the same information as the Trailhead signs, but in a smaller format and on a single post. These signs also contain a location marker for easy map orientation and directional arrows for quick reference.

Trailhead Sign

The County will partner with the Rice Creek Watershed District and others on interpretive signs along the regional trail and the creek. More information on the sign plan can be found in the Appendix of this plan.

The development costs for this plan are approximately \$27m.

Rice Creek West Development Concept Cost Estimate	TOTAL
Banfill Locke Historic House – as new Trailhead Visitor Center for Rice Creek West Regional Trail	\$1,635,000
Parking/Trails Improvements	\$22,560,000
Construct Restroom Building/Trailhead location	\$2,000,000
Amenities	\$205,000
Natural Resource Restoration/Management	\$435,000
Lighting/Security Improvements	\$200,000
Signage	\$95,000
TOTAL	\$27,130,000

Additional information on the timeframe for development and a breakdown of costs can be found in the Appendix.

Demand Forecast

The demand forecast for the trail can be illustrated by looking at trends, public health data and population growth.

Trends

According to the 2023 Outdoor Foundation's Outdoor Participation Trends Report, in 2022, 55 percent of Americans ages 6 and over participated in outdoor recreation at least once, the highest participation rate on record. More than 168 million people participated in outdoor recreation in 2022, with participants becoming more diverse.

Information from one of National Recreation and Parks Association Park Pulse Surveys in 2021 found that 3 in 4 adults in the U.S. want public walking, hiking and biking trails close to home and 84% of millennials say it's important to have access to trails. Other generations were slightly lower, with 74% being the lowest.¹

Public Health

Parks and trails are an integral part of public health. The Covid 19 Pandemic showed the impact and necessity of trails for public health purposes with the significant increase in use. Putting the pandemic aside and looking at other trends in Anoka County, the overall obesity rates increased 6% from 2013 to 2018 and were 7% higher than the State average. The study also found that only 22% of adults meet the recommended physical activity levels for moderate exercise and only 14% meet the vigorous exercise recommendations.² Part of having a healthy community is through access to open space and recreation and this is done through parks and trails. These spaces provide physical and mental benefits to a healthy community. Based on a national report, 92% of U.S. adults experience a positive mental health boost after spending time at their local parks.³

Population

In the metropolitan area, the population is expected to gain 657,000 people by 2050, which will bring the region's population to about 3.8 million people by 2050⁴. Black, Latino and Asian (BIPOC) populations are expected to almost double during the same time period⁵. The population in Anoka County in 2022 was 368,280⁶ and is the fourth most populated county in the State of Minnesota. With a forecasted population of more than 398,489 by 2040⁷, the population is expected to grow by more than 8 percent. As the population grows, so will the demand for trails for recreation and transportation purposes.

⁵ Metropolitan Council – Metro Stats, Twin Cities Regional Forecasted to Reach Four Million Residents by 2025 (2021 update).

⁶ Minnesota State Demographic Center – Latest annual estimates of MN and its 87 counties population and households, 2022.

⁷ Metropolitan Council – The Regional Forecast, Population and Employment in the Twin Cities in 2050 (2023 Update).

Conflicts

Since the regional trail is already existing and has existed for many years, any conflicts with different adjacent land uses have been addressed. The existing land use surrounding the trail is mostly residential with some industry and civic uses.

The most concerning conflict brought up during the engagement process was related to the trail crossing high-speed roads. As a direct result of these comments, two pedestrian tunnels are proposed in the development concept of this plan.

Other conflicts mentioned were safety related as well. A few people voiced their concern about feeling unsafe on the trail, having to deal with unleashed dogs, homelessness, vandalism, crime, loitering and trash. In discussions with the public, some new ideas to address these issues were shared. Increasing security patrols along the trail and adding lighting along the trail were two items mentioned. To address this, additional lighting is proposed in the plan for higher use area and the County, as part of its natural resource management of the trail corridor, will be working continuously to remove the invasive buckthorn understory and plant natives for better sight lines and provide users a better sense of safety by being able to see their surroundings easier. Additionally, the County proposes to patrol the trail regularly and work with the local agency on any issues that arise. Trash containers are placed strategically at locations that are easily accessible and where most of the garbage is generated, e.g., trailhead locations, parking lots, picnic areas, restrooms. One of the proposed solutions for the trail to provide a better sense of safety, was to create a video of a Rice Creek West Regional Trail “ride along” that can be posted to the trail’s webpage and social media. This would allow people to see what the trail is like before they use it.

Public Services

There is no non-recreation related public services and facilities needed to accommodate the regional trail. The public services required are specifically recreation related, which is to establish a new trailhead facility for the regional trail off 69th Avenue in Fridley. The County has consulted with the City of Fridley’s Engineering and Planning Departments on proposed connections for water and sanitary services and will continue to work with the City on these facilities.

Operations

Ordinance

Anoka County Ordinance dated January 30, 2018, regulates the parks and trails under the jurisdiction of Anoka County. The County will continue to encourage safe and enjoyable user experiences through education, monitoring and collaboration between the County and City of Fridley. Safety and security along the trail will include increased patrols and lighting in strategic places.

Operating Costs

Estimated annual operating costs for the trail are approximately \$40,000. Due to the reduced state funding for operations and maintenance, Anoka County supports the regional parks system with visitor fees, such as daily and annual park pass sales, pavilion rental fees and programming fees, as well as the parks operating budget. While the regional trail use is free of charge, and none of the adjacent parks require entrance fees, some of the other regional parks in the Anoka County system do require vehicle entrance fees.

Energy

Anoka County currently employs a remote building automation system that saves the department \$5,000-10,000 annually compared to traditional energy systems, by realizing energy reductions in heating, cooling, lighting, and domestic water during unoccupied and off-peak periods. The program enables staff to monitor, adjust, and troubleshoot building mechanical systems at all the widespread park facilities from a single location, aiding in prompt management and repair. The County has also undertaken a project to convert lighting in key facilities to LED technology to reduce energy demands. The Maintenance and Parks Services Units utility vehicle fleets include a growing number of electric powered vehicles. Turf irrigation systems employ “rain sensor” technology to avoid using valuable water during periods of precipitation and the County has encouraged employees to go “digital” to reduce the amount of paper in the workplace, by utilizing smaller more portable laptop computers and tablets.

Recycling

The County, through the Recycle & Resource Solutions Department employs a refuse and recycling program that requires recycling of paper, plastics, etc. Trash containers and recycling receptacles are placed along the trail in strategic locations for ease of use for the trail users and maintenance staff. Refuse that cannot be reused or recycled is collected and disposed of consistent with applicable laws and regulations.

Public/Partner Engagement & Participation Equity Analysis

1. Scope of Engagement Area:

Overall, Minnesota Compass reports that Anoka County’s population is more than 350,000 with most of the population being between 25 and 64 years of age. People of color make up only 20% of Anoka County’s population and people with disabilities make up only 12% of the population. That demographic information provides an initial equity analysis of who may be underserved and who should be sought out for feedback: those under the age of 25 and over the age of 65, people of color, and people with disabilities.

Boundaries considered for public engagement for this master plan include adjacent City of Fridley neighborhoods along the trail corridor up to one mile away, including part of Ramsey County. In looking at the demographic information in this area and using the Regional Park Equity Tool, Anoka County was able to identify population groups to engage for feedback on the Master Plan. Within a 1-mile radius around the trail corridor, those under 25 comprise up to 37% of the population, which is a substantial number of future stakeholders who should be engaged in the planning process. Those over age 65 are up to 24% of the population and 8% of the population in the area are people with disabilities. The City of Fridley is more racially diverse than elsewhere in the county with Black, Indigenous, People of Color (BIPOC) making up anywhere from 14% to 53% of the surrounding population. These identified stakeholders should be engaged to provide the County a better understanding of their needs and wants for parks and recreation.

In addition, the County reached out to the City of Fridley through their Parks Commission, Fridley Police Citizens Advisory Committee, Fridley Environmental Quality & Energy Commission and City Council, as well as Outdoor Latino, Outdoor Afro, the Disability and Aging Network, Rice Creek Watershed District, County Highway Department and MN Department of Transportation.

2. Context:

To ensure the legacy and stewardship of parks, trails, and open space, it is important to provide memorable experiences for the younger population that they can carry forward throughout their lives. Other stakeholders and underserved populations may not feel welcome in the parks, or they may not know what to do in the parks. Reaching out to and engaging with the underserved populations and seeking a dialogue with them regarding parks, trails and recreation can provide an introduction the Regional Park System and promote the activities and opportunities that the system offers. This also allows for changes and improvements to those parks, trails and recreation activities that would make them more welcoming and inviting to underserved populations. This makes it important for Rice Creek West Regional Trail to be welcoming and inclusive to provide access for all to enjoy its recreational opportunities and natural resources.

3. Public Engagement and Participation:

a. Participants:

The County worked with the Outdoor Latino, Outdoor Afro groups as well as the Disability and Aging Network, along with several City Commissions and Committee's, including the Parks Commission, the Fridley Police Citizen Advisory Committee, the Environmental Quality and Energy Commission and the Fridley Community Network to engage the public. The County also reached out to the Target Distribution Center and Medtronic as they are large job centers near the trail. In all, we reached more than 15,000 people through the in-person meetings, online surveys, and social media for the engagement efforts for this plan.

b. Engagement:

Using the International Association for Public Participation's Public Participation Spectrum, the County's approach for public engagement was to inform and consult with the public. According to the spectrum, this allows the County to listen to and acknowledge concerns and aspirations about certain projects and keep the public informed as to how their feedback influenced the plan.

The County engaged with the public several times during the long-range planning process and used a variety of methods, including in-person meetings, events, surveys, and social media, depending on the group's preference. The County asked for initial feedback on the trail, reported back to the community what was said and then sought additional input and feedback on the development concept. Lastly, the long-range plan report was sent out for public input for a 30-day comment period. While the surveys and social media posts were great for engaging the public, the in-person meetings and events were best for the targeted population groups.

c. Public Participation:

For engagement process, the County received a lot of feedback from the public. Most notable was trail safety. Every group brought up some aspect of safety along the trail corridor. All groups, but specifically the Disability and Aging Network, brought up the steep grades and vehicle conflicts at major road crossings, which make the trail less accessible to people with mobility restrictions or other disabilities. The high-speed road crossings of are great concern to the city and residents in the area. These issues are specifically addressed in the development concept of the plan through the proposed regrading and reconstruction of the trail in certain sections and the proposed pedestrian tunnels. Bikers had concerns about sharp curves, sight lines, visibility in certain areas, while walkers had more safety concerns regarding trash, graffiti, homelessness, loitering. The Fridley Parks Commission would like to see the creek maintained better to allow for water recreation and this issue is specifically discussed in the plan as it relates to the Rice Creek Water Trail. The County did not get great feedback from Outdoor Latino or Outdoor Afro but was informed that providing park and trail information in Spanish would help make the Latino population more welcome and comfortable using the trail.

4. Evaluation Summary:

a. Transparency:

Overall, the public participation and engagement conducted for this long-range plan provided valuable information that influenced the plan. Most improvements proposed are a direct result of that engagement and include proposed pedestrian tunnels under high-speed roads, trail segment reconstruction for access, and a single-track trail.

Since the City of Fridley has invoked the termination clause of the Joint Powers Agreement with the County, as of November 15, 2023, the City will be taking over the operations and maintenance of Locke Park and will be providing those services. Therefore, the long-range plan does not address any public input and/or improvements related to Locke Park.

The Rice Creek Watershed did provide comment on the plan and reviewed their various rules the improvements would fall under. The County will continue to work with the district as the projects move forward. One comment of note is the sediment accumulation in Locke Lake, which is outside the County's jurisdiction, but within the City of Fridley's. There have been on-going discussions with the city regarding the eastern lobe of Locke Lake that has been maintained as a sedimentation basin by the watershed district in the past, but future maintenance is unclear. In addition, the district has completed some streambank restoration projects upstream that will perhaps slow the sedimentation but called out that the sedimentation could influence the City's plans for a canoe/kayak launch at the Locke Lake Park.

b. Accountability:

The public engagement and planning efforts have created a long-range plan that will provide a better regional trail that will be smoother, safer, and more aesthetically pleasing. The trail should draw more people locally and from the region and provide them with a unique trail experience. The long-range plan, once approved, will be shared with the public and the specifically identified groups the County has worked with. The planning process should create better outcomes since most of the proposed improvements are a direct result of public engagement. The engagement process allowed the public to learn how the County plans its parks and that everyone's input matters. The County will continue to work with the public and groups as resources become available and implementation of the improvements occur. The intent is that by seeing the improvements as they are implemented, the public can feel a sense of ownership of those improvements and realize that the County listens and responds to public input.

Public Awareness

Public awareness is an important component of the regional parks and trails system. The County will continue to work with the Metropolitan Council's regional parks and trails system program to create awareness of the regional system through public information maps, websites, social media, publications, and brochures. Community engagement activities will continue throughout the year to receive feedback on long-range plans and provide information on park amenities and recreational opportunities throughout the Anoka County Parks and trails system. The Anoka County Parks website will also host transit route information for easy access into the regional parks and trails.

Accessibility

Anoka County continually strives to provide equal access to all residents of Anoka County and the region. The regional trails, such as Rice Creek West Regional Trail, are free to use.

There are several transit stops near the trail located mostly at major road intersections. Access to the trail can be gained through transit stops at East River Road and Harmon Circle on Route 852; at Highway 47 and 69th Avenue on Routes 10, 824, and 854; at Highway 65 and 68th Avenue; and along CSAH 35 and 69th Avenue.

While transit access to the trail is available, the Anoka County Traveler Transit Link and Metro Mobility dial-a-ride services also provide transportation for a minimal fee. Transit Link will pick up and drop off passengers anywhere there is an address or cross street, or anywhere along the regional trail if the vehicle does not have to back up. Currently all the vehicles are equipped with bike racks so passengers wishing to bike on the trail could use Transit Link to preschedule a trip to/from anywhere along the trail that a large vehicle can access.

Transit Link Vehicle

The County is currently undertaking an update to the Parks ADA Transition Plan, with the intent to ensure that any new development along the trail will eliminate existing barriers, to the extent feasible, and ensure that the trail and any facilities and amenities will conform to or surpass the standards mandated by the Americans with Disabilities Act. In this plan, several sections of the trail are called out to be redeveloped, and the pedestrian bridges along the trail are all proposed to be replaced in order to update those to current ADA requirements. In addition, any other issues found will be addressed when reconstructed. The ADA Transition Plan is expected to be completed in 2024.

Rice Creek West Development Concept Timeline and Cost Estimate	1-2 years	3-5 years	5-10 years	10-20 years	TOTAL
Trail Segment 1 (Manomin)					
Banfill Locke Historic House – as new Trailhead Visitor Center for Rice Creek West Regional Trail					\$1,635,000
Exterior renovation:					
Foundation	\$500,000				
Roof	\$100,000				
Windows/Doors	\$350,000				
Siding	\$175,000				
Interior Renovations	\$500,000				
Equipment rental	\$10,000				
Parking/Trails:					\$2,750,000
Reconfigure and reconstruct trail from Banfill to bridge for ADA		\$300,000			
Pave ADA access to "island"				\$400,000	
Reconstruct north parking lot		\$300,000			
Reconstruct Banfill lot				\$300,000	
Two Bridge Replacements				\$950,000	
Reconstruct trails				\$500,000	
Amenities:					\$205,000
Gazebo Roof Replacement			\$50,000		
Lighting Improvements			\$50,000		
Shorefishing opp's. - boulder steps			\$15,000		
Reconstruct the fishing deck on Locke Lake			\$50,000		
Reconstruction the Kayak/Canoe take out			\$40,000		
Natural Resource Restoration/Management	\$10,000	\$20,000	\$20,000	\$50,000	\$100,000
Signage:					\$20,000
Wayfinding	\$5,000				
Interpretive - historical/cultural, natural resource	\$10,000				
Trailhead signage	\$5,000				
SUBTOTALS	\$1,665,000	\$620,000	\$225,000	\$2,200,000	\$4,710,000

Rice Creek West Development Concept Timeline and Cost Estimate	1-2 years	3-5 years	5-10 years	10-20 years	TOTAL
Trail Segment 2 (ERR, Rice Creek Way, Locke Lake Park)					
Trail Easement - City of Fridley	\$0				\$0.00
Trail Improvements:					\$900,000
Reconstruct Trail/Improve trail grades & safety				\$600,000	
Reconfigure RCW/MRT intersection				\$300,000	
Signage					\$20,000
Directional signage improvements along East River Road and Rice Creek Way or street striping - share the road	\$5,000				
Safety signs for sharp curves/steep grades	\$5,000				
Intersection sign/directional wayfinding	\$5,000				
Lake/creek interpretative info		\$5,000			
SUBTOTALS	\$15,000	\$5,000	\$0	\$900,000	\$920,000
Trail Segment 3 (Plaza Park, Community Park to across 47):					
Trail Easement - City of Fridley/Limited Use Agreement - BNSF & MNDOT	\$55,000				\$55,000.00
Trail Improvements					\$4,000,000
Construct safe pedestrian crossing at SH47.			\$1,500,000		
Build new trail to/from proposed tunnel.			\$950,000		
Reconstruct trail					
Soften curves, re-align sections				\$200,000	
Increase turning radii of trail around pond				\$200,000	
Reconfigure/regrade approach to service rd/69th (both sides of 47)			\$200,000		
Reconstruct, regrade trail intersection at 69th and 47			\$175,000		
Reconstruct remaining trail				\$750,000	
Vegetation management around pond for visual access		\$25,000			
Natural Resource Restoration/Management		\$10,000	\$20,000	\$25,000	\$55,000
Signage:					\$15,000
Update park signage					
Wayfinding	\$5,000				
Interpretive - historical/cultural, natural resource	\$10,000				
SUBTOTALS	\$70,000	\$35,000	\$2,845,000	\$1,175,000	\$4,125,000

Rice Creek West Development Concept Timeline and Cost Estimate	1-2 years	3-5 years	5-10 years	10-20 years	TOTAL
Trail Segment 4 (47 to 65 includes Locke Park):					
Trail Easements - City of Fridley					\$0
Trail Improvements					\$4,505,000
Reconstruct trail / Accessibility Improvements	\$500,000	\$2,500,000	\$500,000		
Bike fix-it station/Bike Rack	\$5,000				
Replace one trail pedestrian bridge				\$1,000,000	
Signage					\$10,000
Interpretive signage		\$5,000			
Directional/intersectional signage	\$5,000				
Lighting Improvements			\$100,000	\$50,000	\$150,000
SUBTOTALS	\$510,000	\$2,505,000	\$600,000	\$1,050,000	\$4,665,000
Trail Segment 5 (65 to Old Central)					
Existing Tunnel Improvements					\$525,000
Resurfacing				\$150,000	
Drainage Improvements			\$300,000		
Lighting improvements				\$75,000	
Trail Improvements					\$2,825,000
Reconstruct and regrade trail for ADA access				\$1,250,000	
Soften curves/improve sight lines				\$300,000	
Visual/Physical access sites to creek				\$75,000	
Replace bridge				\$950,000	
Natural surface trail addition (900+ LF)				\$250,000	
Construct safe crossing at Old Central			\$1,500,000		\$1,500,000

13321	Vegetables with 11-25% impervious cover	1.hh.CN.i25.cVG.
13330	26% to 50% impervious cover with cultivated herbaceous vegetation	1.hh.CN.i50.
13332	Forbs (flowers) with 26-50% impervious cover	1.hh.CN.i50.cFB.
13331	Vegetables with 26-50% impervious cover	1.hh.CN.i50.cVG.
13340	51% to 75% impervious cover with cultivated herbaceous vegetation	1.hh.CN.i75.
13342	Forbs (flowers) with 51-75% impervious cover	1.hh.CN.i75.cFB.
13341	Vegetables with 51-75% impervious cover	1.hh.CN.i75.cVG.
13100	Artificial surfaces with perennial grasses with sparse trees	1.hh.CT.
13110	4% to 10% impervious cover with perennial grasses and sparse trees	1.hh.CT.i10.
13113	Aspen openings with 4-10% impervious cover	1.hh.CT.i10.cAO.
13115	Long grasses and mixed trees with 4-10% impervious cover	1.hh.CT.i10.cGL.
13114	Short grasses and mixed trees with 4-10% impervious cover	1.hh.CT.i10.cGS.
13111	Jack pine barrens with 4-10% impervious cover	1.hh.CT.i10.cJB.
13112	Oak savanna with 4-10% impervious cover	1.hh.CT.i10.cOS.
13120	11% to 25% impervious cover with perennial grasses and sparse trees	1.hh.CT.i25.
13123	Aspen openings with 11-25% impervious cover	1.hh.CT.i25.cAO.
13125	Long grasses and mixed trees with 11-25% impervious cover	1.hh.CT.i25.cGL.
13124	Short grasses and mixed trees with 11-25% impervious cover	1.hh.CT.i25.cGS.
13121	Jack pine barrens with 11-25% impervious cover	1.hh.CT.i25.cJB.
13122	Oak savanna with 11-25% impervious cover	1.hh.CT.i25.cOS.
13130	26% to 50% impervious cover with perennial grasses and sparse trees	1.hh.CT.i50.
13133	Aspen openings with 26-50% impervious cover	1.hh.CT.i50.cAO.
13135	Long grasses and mixed trees with 26-50% impervious cover	1.hh.CT.i50.cGL.
13134	Short grasses and mixed trees with 26-50% impervious cover	1.hh.CT.i50.cGS.
13131	Jack pine barrens with 26-50% impervious cover	1.hh.CT.i50.cJB.
13132	Oak savanna with 26-50% impervious cover	1.hh.CT.i50.cOS.
13140	51% to 75% impervious cover with perennial grasses and sparse trees	1.hh.CT.i75.
13143	Aspen openings with 51-75% impervious cover	1.hh.CT.i75.cAO.
13145	Long grasses and mixed trees with 51-75% impervious cover	1.hh.CT.i75.cGL.
13144	Short grasses and mixed trees with 51-75% impervious cover	1.hh.CT.i75.cGS.

13141	Jack pine barrens with 51-75% impervious cover	1.hh.CT.i75.cJB.
13142	Oak savanna with 51-75% impervious cover	1.hh.CT.i75.cOS.
14000	Artificial surfaces with less than 25% vegetation cover	1.mv.
14100	Buildings and/or pavement	1.mv.BP.
14110	76% to 90% impervious cover	1.mv.BP.i90.
14111	Buildings with 76-90% impervious cover	1.mv.BP.i90.cBD.
14113	Buildings and pavement with 76-90% impervious cover	1.mv.BP.i90.cBP.
14112	Pavement with 76-90% impervious cover	1.mv.BP.i90.cPV.
14120	91% to 100% impervious cover	1.mv.BP.i99.
14121	Buildings with 91-100% impervious cover	1.mv.BP.i99.cBD.
14123	Buildings and pavement with 91-100% impervious cover	1.mv.BP.i99.cBP.
14122	Pavement with 91-100% impervious cover	1.mv.BP.i99.cPV.
14200	Exposed earth	1.mv.EE.
14210	0% to 10% impervious cover-exposed earth	1.mv.EE.e10.
14213	Landfill with 0-10% impervious cover	1.mv.EE.e10.cLF.
14211	Mines with 0-10% impervious cover	1.mv.EE.e10.cMN.
14214	Other exposed/transitional land with 0-10% impervious cover	1.mv.EE.e10.cOE.
14212	Sand and gravel pits with 0-10% impervious cover	1.mv.EE.e10.cSG.
14220	11% to 25% impervious cover-exposed earth	1.mv.EE.e25.
14223	Landfill with 11-25% impervious cover	1.mv.EE.e25.cLF.
14221	Mines with 11-25% impervious cover	1.mv.EE.e25.cMN.
14224	Other exposed/transitional land with 11-25% impervious cover	1.mv.EE.e25.cOE.
14222	Sand and gravel pits with 11-25% impervious cover	1.mv.EE.e25.cSG.
14230	26% to 50% impervious cover-exposed earth	1.mv.EE.e50.
14233	Landfill with 26-50% impervious cover	1.mv.EE.e50.cLF.
14231	Mines with 26-50% impervious cover	1.mv.EE.e50.cMN.
14234	Other exposed/transitional land with 26-50% impervious cover.	1.mv.EE.e50.cOE.
14232	Sand and gravel pits with 26-50% impervious cover	1.mv.EE.e50.cSG.
12000	Artificial surfaces with coniferous and/or deciduous shrub dominant vegetation (25% to 96%)	1.ss.
12200	Artificial surfaces with coniferous and/or deciduous shrubs with sparse trees	1.ss.CE.
12210	4% to 10% impervious cover with coniferous and/or deciduous shrubs and sparse trees	1.ss.CE.i10.
12212	Other coniferous and/or deciduous shrubs and trees with 4-10% impervious cover	1.ss.CE.i10.cOR.
12211	Oak woodland brushland with 4-10% impervious cover	1.ss.CE.i10.cOW.
12220	11% to 25% impervious cover with coniferous and/or deciduous shrubs and sparse trees	1.ss.CE.i25.
12222	Other coniferous and/or deciduous shrubs and trees with 11-25% impervious cover	1.ss.CE.i25.cOR.
12221	Oak woodland brushland with 11-25% impervious cover	1.ss.CE.i25.cOW.
12230	26% to 50% impervious cover with coniferous and/or deciduous shrubs and sparse trees	1.ss.CE.i50.
12232	Other coniferous and/or deciduous shrubs and trees with 26-50% impervious cover	1.ss.CE.i50.cOR.
12231	Oak woodland brushland with 26-50% impervious cover	1.ss.CE.i50.cOW.
12240	51% to 75% impervious cover with coniferous and/or deciduous shrubs and sparse trees	1.ss.CE.i75.
12242	Other coniferous and/or deciduous shrubs and trees with 51-75% impervious cover	1.ss.CE.i75.cOR.
12241	Oak Woodland brushland with 51-75% impervious cover	1.ss.CE.i75.cOW.
12100	Artificial surfaces with coniferous and/or deciduous shrubs	1.ss.CS.
12110	4% to 10% impervious cover with coniferous and/or deciduous shrubs	1.ss.CS.i10.
12112	Long grasses with planted coniferous and/or deciduous shrubs, 4-10% impervious cover	1.ss.CS.i10.cGL.
12111	Short grasses with planted coniferous and/or deciduous shrubs, 4-10% impervious cover	1.ss.CS.i10.cGS.
12113	Other coniferous and/or deciduous shrubs with 4-10% impervious cover	1.ss.CS.i10.cOB.
12120	11% to 25% impervious cover with coniferous and/or deciduous shrubs	1.ss.CS.i25.
12122	Long grasses with planted coniferous and/or deciduous shrubs, 11-25% impervious cover	1.ss.CS.i25.cGL.
12121	Short grasses with planted coniferous and/or deciduous shrubs, 11-25% impervious cover	1.ss.CS.i25.cGS.
12123	Other coniferous and/or deciduous shrubs, 11-25% impervious cover	1.ss.CS.i25.cOB.
12130	26% to 50% impervious cover with coniferous and/or deciduous shrubs	1.ss.CS.i50.
12132	Long grasses with planted coniferous and/or deciduous shrubs, 26-50% impervious cover	1.ss.CS.i50.cGL.
12131	Short grasses with planted coniferous and/or deciduous shrubs, 26-50% impervious cover	1.ss.CS.i50.cGS.
12133	Other coniferous and/or deciduous shrubs, 26-50% impervious cover	1.ss.CS.i50.cOB.
12140	51% to 75% impervious cover with coniferous and/or deciduous shrubs	1.ss.CS.i75.
12142	Long grasses with planted coniferous and/or deciduous shrubs, 51-75% impervious cover	1.ss.CS.i75.cGL.
12141	Short grasses with planted coniferous and/or deciduous shrubs, 51-75% impervious cover	1.ss.CS.i75.cGS.
12143	Other coniferous and/or deciduous shrubs, 51-75% impervious cover	1.ss.CS.i75.cOB.
11000	Artificial surfaces with trees as the dominant vegetation cover	1.tt.

11100	Artificial surfaces with coniferous trees	1.tt.CC.
11110	4% to 10% impervious cover with coniferous trees	1.tt.CC.i10.
11111	Jack pine (forest or woodland) with 4-10% impervious cover	1.tt.CC.i10.cJP.
11115	Northern conifer (woodland) with 4-10% impervious cover	1.tt.CC.i10.cNW.
11119	Other planted conifers with 4-10% impervious cover	1.tt.CC.i10.cPC.
11116	Planted red pine with 4-10% impervious cover	1.tt.CC.i10.cPR.
11118	Planted spruce/fir with 4-10% impervious cover	1.tt.CC.i10.cPS.
11117	Planted white pine with 4-10% impervious cover	1.tt.CC.i10.cPW.
11114	Eastern red cedar (woodland) with 4-10% impervious cover	1.tt.CC.i10.cRC.
11113	Spruce-fir (forest) with 4-10% impervious cover	1.tt.CC.i10.cSF.
11112	White/red pine (forest) with 4-10% impervious cover	1.tt.CC.i10.cWF.
11120	11% to 25% impervious cover with coniferous trees	1.tt.CC.i25.
11121	Jack pine (forest or woodland) with 11- 25% impervious cover	1.tt.CC.i25.cJP.
11125	Northern conifer (woodland) with 11- 25% impervious cover	1.tt.CC.i25.cNW.
11129	Other planted conifers with 11- 25% impervious cover	1.tt.CC.i25.cPC.
11126	Planted red pine with 11- 25% impervious cover	1.tt.CC.i25.cPR.
11128	Planted spruce/fir with 11- 25% impervious cover	1.tt.CC.i25.cPS.
11127	Planted white pine with 11- 25% impervious cover	1.tt.CC.i25.cPW.
11124	Eastern red cedar (woodland) with 11- 25% impervious cover	1.tt.CC.i25.cRC.
11123	Spruce-fir (forest) with 11- 25% impervious cover	1.tt.CC.i25.cSF.
11122	White/red pine (forest) with 11- 25% impervious cover	1.tt.CC.i25.cWF.
11130	26% to 50% impervious cover with coniferous trees	1.tt.CC.i50.
11131	Jack pine (forest or woodland) with 26-50% impervious cover	1.tt.CC.i50.cJP.
11135	Northern conifer (woodland) with 26-50% impervious cover	1.tt.CC.i50.cNW.
11139	Other planted conifers with 26-50% impervious cover	1.tt.CC.i50.cPC.
11136	Planted red pine with 26-50% impervious cover	1.tt.CC.i50.cPR.
11138	Planted spruce/fir with 26-50% impervious cover	1.tt.CC.i50.cPS.
11137	Planted white pine with 26-50% impervious cover	1.tt.CC.i50.cPW.
11134	Eastern red cedar (woodland) with 26-50% impervious cover	1.tt.CC.i50.cRC.
11133	Spruce-fir (forest) with 26-50% impervious cover	1.tt.CC.i50.cSF.
11132	White/red pine (forest) with 26-50% impervious cover	1.tt.CC.i50.cWF.
11140	51% to 75% impervious cover with coniferous trees	1.tt.CC.i75.
11141	Jack pine (forest or woodland) with 51-75% impervious cover	1.tt.CC.i75.cJP.
11145	Northern conifer (woodland) with 51-75% impervious cover	1.tt.CC.i75.cNW.
11149	Other planted conifers with 51-75% impervious cover	1.tt.CC.i75.cPC.
11146	Planted red pine with 51-75% impervious cover	1.tt.CC.i75.cPR.
11148	Planted spruce/fir with 51-75% impervious cover	1.tt.CC.i75.cPS.
11147	Planted white pine with 51-75% impervious cover	1.tt.CC.i75.cPW.
11144	Eastern red cedar (woodland) with 51-75% impervious cover	1.tt.CC.i75.cRC.
11143	Spruce-fir (forest) with 51-75% impervious cover	1.tt.CC.i75.cSF.
11142	White/red pine (forest) with 51-75% impervious cover	1.tt.CC.i75.cWF.
11200	Artificial surfaces with deciduous tree cover	1.tt.CD.
11210	4% to 10% impervious cover with deciduous trees	1.tt.CD.i10.
11215	Aspen-birch (forest) with 4-10% impervious cover	1.tt.CD.i10.cAB.
11216	Aspen (forest, woodland) with 4-10% impervious cover	1.tt.CD.i10.cAF.
11214	Boxelder-green ash (forest) with 4-10% impervious cover	1.tt.CD.i10.cBG.
11213	Maple-basswood (forest) with 4-10% impervious cover	1.tt.CD.i10.cMB.
11212	Northern hardwood (forest) with 4-10% impervious cover	1.tt.CD.i10.cNH.
11211	Oak (forest or woodland) with 4-10% impervious cover	1.tt.CD.i10.cOA.
11217	Planted ash with 4-10% impervious cover	1.tt.CD.i10.cPA.
11219	Other deciduous trees with 4-10% impervious cover	1.tt.CD.i10.cPD.
11218	Planted oak with 4-10% impervious cover	1.tt.CD.i10.cPO.
11220	11% to 25% impervious cover with deciduous trees	1.tt.CD.i25.
11225	Aspen-birch (forest) with 11- 25% impervious cover	1.tt.CD.i25.cAB.
11226	Aspen (forest, woodland) with 11- 25% impervious cover	1.tt.CD.i25.cAF.
11224	Boxelder-green ash (forest) with 11- 25% impervious cover	1.tt.CD.i25.cBG.
11223	Maple-basswood (forest) with 11- 25% impervious cover	1.tt.CD.i25.cMB.
11222	Northern hardwood (forest) with 11- 25% impervious cover	1.tt.CD.i25.cNH.
11221	Oak (forest or woodland) with 11- 25% impervious cover	1.tt.CD.i25.cOA.
11227	Planted ash with 11- 25% impervious cover	1.tt.CD.i25.cPA.

11229	Other deciduous trees with 11- 25% impervious cover	1.tt.CD.i25.cPD.
11228	Planted oak with 11- 25% impervious cover	1.tt.CD.i25.cPO.
11230	26% to 50% impervious cover with deciduous trees	1.tt.CD.i50.
11235	Aspen-birch (forest) with 26-50% impervious cover	1.tt.CD.i50.cAB.
11236	Aspen (forest, woodland) with 26-50% impervious cover	1.tt.CD.i50.cAF.
11234	Boxelder-green ash (forest) with 26-50% impervious cover	1.tt.CD.i50.cBG.
11233	Maple-basswood (forest) with 26-50% impervious cover	1.tt.CD.i50.cMB.
11232	Northern hardwood (forest) with 26-50% impervious cover	1.tt.CD.i50.cNH.
11231	Oak (forest or woodland) with 26-50% impervious cover	1.tt.CD.i50.cOA.
11237	Planted ash with 26-50% impervious cover	1.tt.CD.i50.cPA.
11239	Other deciduous trees with 26-50% impervious cover	1.tt.CD.i50.cPD.
11238	Planted oak with 26-50% impervious cover	1.tt.CD.i50.cPO.
11240	51% to 75% impervious cover with deciduous trees	1.tt.CD.i75.
11245	Aspen-birch (forest) with 51-75% impervious cover	1.tt.CD.i75.cAB.
11246	Aspen (forest, woodland) with 51-75% impervious cover	1.tt.CD.i75.cAF.
11244	Boxelder-green ash (forest) with 51-75% impervious cover	1.tt.CD.i75.cBG.
11243	Maple-basswood (forest) with 51-75% impervious cover	1.tt.CD.i75.cMB.
11242	Northern hardwood (forest) with 51-75% impervious cover	1.tt.CD.i75.cNH.
11241	Oak (forest or woodland) with 51-75% impervious cover	1.tt.CD.i75.cOA.
11247	Planted ash with 51-75% impervious cover	1.tt.CD.i75.cPA.
11249	Other deciduous trees with 51-75% impervious cover	1.tt.CD.i75.cPD.
11248	Planted oak with 51-75% impervious cover	1.tt.CD.i75.cPO.
11300	Artificial surfaces with mixed coniferous and deciduous tree cover	1.tt.CM.
11310	4% to 10% impervious cover with mixed coniferous/deciduous trees	1.tt.CM.i10.
11311	Mixed pine-hardwood (forest) with 4-10% impervious cover	1.tt.CM.i10.cMF.
11313	Northern hardwood-conifer (forest) with 4-10% impervious cover	1.tt.CM.i10.cNF.
11314	Planted mixed coniferous/deciduous trees with 4-10% impervious cover	1.tt.CM.i10.cPM.
11312	White pine-hardwood (forest) with 4-10% impervious cover	1.tt.CM.i10.cWH.
11320	11% to 25% impervious cover with mixed coniferous/deciduous trees	1.tt.CM.i25.
11321	Mixed pine-hardwood (forest) with 11-25% impervious cover	1.tt.CM.i25.cMF.
11323	Northern hardwood-conifer (forest) with 11-25% impervious cover	1.tt.CM.i25.cNF.
11324	Planted mixed coniferous/deciduous trees with 11-25% impervious cover	1.tt.CM.i25.cPM.
11322	White pine-hardwood (forest) with 11-25% impervious cover	1.tt.CM.i25.cWH.
11330	26% to 50% impervious cover with mixed coniferous/deciduous trees	1.tt.CM.i50.
11331	Mixed pine-hardwood (forest) with 26-50% impervious cover	1.tt.CM.i50.cMF.
11333	Northern hardwood-conifer (forest) with 26-50% impervious cover	1.tt.CM.i50.cNF.
11334	Planted mixed coniferous/deciduous trees with 26-50% impervious cover	1.tt.CM.i50.cPM.
11332	White pine-hardwood (forest) with 26-50% impervious cover	1.tt.CM.i50.cWH.
11340	51% to 75% impervious cover with mixed coniferous/deciduous trees	1.tt.CM.i75.
11341	Mixed pine-hardwood (forest) with 51-75% impervious cover	1.tt.CM.i75.cMF.
11343	Northern hardwood-conifer (forest) with 51-75% impervious cover	1.tt.CM.i75.cNF.
11344	Planted mixed coniferous/deciduous trees with 51-75% impervious cover	1.tt.CM.i75.cPM.
11342	White pine-hardwood (forest) with 51-75% impervious cover	1.tt.CM.i75.cWH.

AGENDA REPORT

Meeting Date: May 6, 2024

Meeting Type: Parks and Recreation Commission

Submitted By: Mike Maher, Parks and Recreation Director

Title

2025 Parks Capital Investment Program Recommendation

Background

The City of Fridley uses a five-year Capital Investment Program as a planning and budgeting tool for major expenses, including such items as vehicles, technology upgrades and park infrastructure. Per City Code, the Parks and Recreation Commission is asked to review and approve a Capital Investment Program for the park system for the coming year before June 1 of each year.

Financial Impact

Items detailed in the proposed 2025 Parks Capital Investment Program are all accounted for in the proposed 2025 city budget. Significant proposed infrastructure improvements are all part of the approved park system improvement plan implementation schedule.

Recommendation

Staff recommends that the Commission review the proposed 2025 Parks Capital Investment Program items with the opportunity to ask questions and provide comments. A recommendation for approval of the proposed 2025 Capital Investment Program is requested.

Attachments and Other Resources

- Proposed 2025-2029 Capital Investment Program chart and detail sheets

Vision Statement

We believe Fridley will be a safe, vibrant, friendly and stable home for families and businesses.

Project # 407-31-24600
 Project Name Park Improvement Grant Matching

Account No.: 407-3160-702100

Description

This project provides funds to support matching requirements of the various grants identified by the City to support improvements and other changes throughout the park system.

Justification

Throughout the year, the City identifies various grant program and funding opportunities to support the park system. This project provides monies to meet such requirements on an as needed basis.

Expenditures	2025	2026	2027	2028	2029	Total

Project # 407-31-24604
 Project Name General Park System Maintenance

Account No.: 407-3160-635100

Description

This project provides funds to support deferred park and trail system maintenance.

Justification

Throughout the year, the City identifies miscellaneous improvements or needs throughout the park system. Generally, this project will provide an identified source of funds to support costs associated with these improvements and modifications.

Expenditures	2025	2026	2027	2028	2029	Total

Project # 407-31-24704
 Project Name Edgewater Garden Park Improvements

Account No.: 407-3160-703100

Description

This project is part of the Parks Master Plan implementation and includes general park upgrades in accordance with that plan. The project will include such elements as sitework, new courts, a new parking lot, landscaping, lighting, trails, shelters, fencing, and piers. This project also includes equipment replacement and upgrades to such elements as playground equipment and fixtures.

Justification

The project is intended to implement the Parks Master Plan approved by the City Council in 2022.

Project # 407-31-25100
 Project Name SNC Trail Resurfacing (New)

Account No.: 407-3160-702100

Description

Resurfacing the Outer Loop, Oak Savanna and Creekside Trails, transitioning from woodchip trails to crushed stone.

Justification

Resurfacing trails using a product that has a longer life span than wood chips, which biodegrade, will help reduce the supplies and frequency of regular maintenance needed to keep trails in good condition. Crushed stone will provide a safer and more stable surface for all users.

Project # 407-31-25711
 Project Name Flanery Park Improvements

Account No.: 407-3160-702100

Description

This project is part of the Parks Master Plan implementation and includes general park upgrades in accordance with that plan. The project will include such elements as sitework, new courts, a new parking lot, landscaping, lighting, trails, shelters, fencing, and piers. The project also includes equipment replacement and upgrades to such elements as playground equipment and fixtures.

Justification

The project is intended to implement the Parks Master Plan approved by the City Council in 2022.

Project # 407-31-26002
Project Name Commons Park Vehicle and Equipment Storage Shelter

Account No.:

Description

This project will provide for vehicle storage and equipment storage for the Parks and Recreation Department and Public Works Department - Water Division.

Justification

The improvement would provide space for approximately 10 vehicles and seasonal recreation equipment storage. The project will be partially funded by the Commons Park Improvement project in the PSIP, and through the Water Utility Fund. Construction of this project will abate the need for expansion of cold storage at the Public Works Facility and remove that project from the CIP.

AGENDA REPORT

Meeting Date: May 6, 2024

Meeting Type: Parks and Recreation Commission

Submitted By: Mike Maher, Parks and Recreation Director

Title

Commons Park Recreation Building Discussion

Background

Commons Park will receive significant improvements as the second of two community park renovations funded through the City's Park System Improvement Plan. Building and site design will be substantially completed in 2024, with construction expected to begin in 2025. HCM Architects have been brought on board to design our recreation building and the evaluation process is underway to hire a landscape architect.

Central to the park design will be an interconnected complex featuring a park building, parking, splash pad, inclusive playground, and winter recreation area. The recreation building budget, established in the 2021 Park System Improvement Plan document, was set at \$4 million. Staff has developed a vision for the building to be an operational hub for Fridley Parks and Recreation and to feature restrooms, warming and gathering areas, classrooms, and an indoor play space. The project team recommends allocation of an additional \$1 million in budget allocation to the park building to fully realize the vision for this central hub of the park project.

Financial Impact

The Commons Park project total budget is \$11-12 million. Staff has identified several strategies to achieve the overall goals of the park plan while allocating an additional \$1 million towards the park building. Staff expects the overall project to still meet the \$11-12 million budget.

Recommendation

Staff recommends that the Commission review the vision for operations and community impact of the new recreation building and endorse a \$5 million budget for the recreation building to the Fridley City Council. Council will review the project at their May 13th conference meeting.

Attachments and Other Resources

- Commons Park Recreation Building Discussion Presentation

Vision Statement

We believe Fridley will be a safe, vibrant, friendly and stable home for families and businesses.

Commons Park Recreation Building

Case for additional budget authority for
the Commons Park Recreation Building
DRAFT VERSION

Commons Park: A four-season destination park at the heart of Fridley

Park System Improvement Plan Guiding Themes

Improved
Playgrounds
& Amenities

Gathering
Spaces

Year-Round Use
& Connectivity

Unique
Amenities and
Experiences

Background and Concept

- Park building to support splash pad, inclusive play, winter recreation
- Serve as an operational hub for Fridley Parks and Recreation
- Year-round events, programs, classes
- Support community events and partnerships
- \$4 million budget established in the approved Park System Improvement Plan for a park building

Recreation Building Features

- Classrooms to serve up to 60 students for year-round programming, birthday parties, rentals
- Recreation staff workspace
- Indoor playground for unique all-season recreation and gathering
- Warming and informal gathering spaces
- Kitchenette and serving window
- Mechanical and Electrical
- Restrooms
- Reception
- Storage

Indoor Playground Concept

- Provides a year-round recreation attraction
- Serves as the recreation “anchor” for the park building
- Attraction for youth birthday parties and community gatherings
- Connect those with young children with Fridley Parks and Recreation for life-long opportunities
- With \$4 million budget, space allocation is 800 square feet, which will limit or eliminate concept
- Indoor-specific vs traditional equipment options

Indoor Playground Concept Alternatives

or...

Outdoor Equipment Indoors

- More durable
- Known vendors
- Accessibility may be improved
- Less-efficient use of space
- Surfacing required for fall zones

Indoor Play Equipment

- Most efficient use of space
- Vendors unknown
- May be less durable
- Fall surfacing not necessary
- More economical

Recreation Building Service Delivery

- Staffed recreation center model with regular hours, including weekends
- Amenity hub for Fridley's signature park
- Frequent interaction between staff and public
- Classes, birthday parties, events and programs year-round. Home to summer ROCKS
- Small room rental, equipment checkout
- Fridley's most visited park will provide unprecedented opportunities for engagement
- Indoor playground featuring a minimal fee or annual membership
- Strong, identifiable location and brand for Fridley Parks and Recreation

Fridley Parks and Recreation Staffing

- Will put staff in direct contact with up to 100,000 park visitors per year
- Increased oversight of programming
- Reception desk to welcome guests
- 2-3 staff to ensure smooth operations
- Community-building capacity increases
- Staff presence promotes safe use of park
- Deliberate and planful approach to future of Parks and Recreation in Fridley
- Staffing to include mix of full and part time staff with up to 8 flex workstations

A Case for Increased Budget Authority

- Increased staff support infrastructure required to realize operational vision
- Additional square footage needed to create indoor playground consistent with four season destination park vision
- Account for indoor play equipment costs
- Shown storage may be inadequate
- Site security enhancements
- Facility will serve the community for generations to come
- Facility will be open to the public as a community recreation center
- Project team recommends increasing budget from \$4 million to \$5 million

Commons Park Budget Adjustments

Revenue, Grants, Opportunities

- Sponsorship and naming opportunities
- DNR and State of Minnesota Grants
- Adjust overall \$11-12 million budget:
 - Integrate some restrooms into standalone building or park shelter
 - Re-use existing parking footprint
 - Re-use existing tennis court with mill and overlay for pickleball
- Environmental grants
- Inter-agency agreements
- In-house engineering where possible

Questions and Discussion

AGENDA REPORT

Meeting Date: May 6, 2024

Meeting Type: Parks and Recreation Commission

Submitted By: Tara Rogness, Springbrook Nature Center Manager

Title

Springbrook Nature Center Report

Background

Attached is the update from Springbrook Nature Center for the May 6, 2024 Parks and Recreation Commission meeting.

Financial Impact

None.

Recommendation

None.

Attachments and Other Resources

- Springbrook Nature Center Update for May 6, 2024 meeting

Vision Statement

We believe Fridley will be a safe, vibrant, friendly and stable home for families and businesses.

April Education Programs

- Springbrook Naturalists visited all the 8th grade classrooms at Fridley Middle School for a lesson on solar houses. This introduction helped students demonstrate they understand the concepts of heat transfer (radiation, conduction, and convection) through a project in which students create a house that will gain heat while in the sun and hold heat while in the shade.
- Stevenson third grade students learned about Inherited and acquired traits while competing in a gameshow and then got the chance to create their own creature featuring their previous knowledge about growth, survival, reproduction, and adaptations.
- Nature Preschool Club met weekly in April, our 4 & 5 year old explorers learned about nature with games, songs, and exploration time with "Mr. Cody", Gabi and Kaitlyn.
- Adams elementary third graders participated in a shelter building program while on the Adams Nature Trail.
- Kids on the Move (a local daycare cooperative) learned about baby animals out on the Springbrook trails with naturalist Katy.
- Naturalist Gabi presented multiple free animal feeding programs throughout April, showcasing the mechanisms by which a variety of our exhibit animals eat.
- Naturalist Gabi taught excited 3-5 year olds at New Creations Day Care Center about the upcoming eclipse.
- Stevenson third graders visited SNC to learn about and observe how animals and their offspring are both similar and different. They played a game that simulated the life cycle of spawning salmon and hiked the trails in search of baby animals.
- Adams Elementary 2nd graders took to the Adams Nature Trail to look for Spring ephemerals. They will visit the same spots in a week or two to see how much change they can notice about the spots they visited.
- Gabi presented a well-attended public program entitled "Naturalism 101" to a group of 20. She taught them about using their senses in nature while out on the trail.
- Hayes and Stevenson Kindergarten classes participated in their first naturalist-led program at their schools. Students were able to observe living and non-living things while outdoors.
- Naturalists Cody and Kaitlyn taught an Outdoor Survival Class to a local homeschool group, teaching about survival shelters and prioritizing needs and wants.
- 90 First Graders from Sunnyside Elementary School visited to learn about habitats. They explored the pond, prairie and forest in search of what makes each kind of habitat special.
- Hayes and Stevenson Elementary learned about life cycles with naturalist staff. They will be raising butterflies in their classrooms throughout their unit.
- Minnehaha Academy was onsite with 15-20 6th – 8th graders learning about archery and survival with Cody.
- Adams elementary first grade classrooms learned about animal signs on the Nature Trail.
- Hayes and Stevenson Kindergarten classrooms learned about habitats during their field trip to SNC.
- Naturalist Gabi created and taught a free Phenology program for the public.
- Hayes and Stevenson Elementary Kindergarteners learned about recycling.
- Hayes and Stevenson Elementary First Graders learned about life cycles by looking for juvenile species of dragonflies, damselflies and other macroinvertebrates in the wetland.

- Adams Kindergarten students went back to visit the tree friend that they made at the beginning of the year to see how much it has changed since September (out on the Adams Nature Trail)

April Rentals

- 1 indoor rental for a family birthday party
- 8 Birthday Parties with topics including forts, eco-pirates, pond exploration, wildlife scavenger hunt, archery, and reptiles.

Grants

- We are waiting to hear about the status of the Xcel Energy Grant which we titled, "Wild Connections in Environmental Education".

Park & Building Maintenance

- There have been a few minor repairs in the building and in the park this month including clearing out debris at one of the weirs, AV system programming fixes, and changing out lightbulbs that have burned out.

Events

- The Springbrook Nature Center Foundation held its annual Springbrook Spree on Saturday, April 6. More than 120 people attended the event which raised more than \$25,000 to support the mission of the nature center. (To cultivate connections between people and nature). There were fundraising games to play, as well as silent and live auctions. Overall, it was a great success!

Upcoming Events

Environmental Fun Fair will take place on Saturday, May 18th. 11 a.m. - 2 p.m. at Springbrook Nature Center

- Event Passport and Prizes
- Environmental and Educational exhibitors
- Pop-Up Community Toy Store
- Stock the Community Toy Store: Swap out your old, under-utilized toys this year. Help us promote reuse in our community by dropping off your lightly-loved children's toys, puzzles, games and art supplies to be distributed during the Pop-Up Community Toy Store at the Environmental Fun Fair. We will be collecting toys in the lobbies of Fridley City Hall and Springbrook Nature Center during business hours from April 16-May 16.
- Games, Crafts & Activities focused around Environmental Stewardship
- Bouncy Castle
- And more!

HIGHLIGHTS

Recreation Division: April 2024

Spring Programs

Below is a list of programs and participation numbers for those taking place during April.

Preschool: Ages 3-5

Soccer (5 sessions): Apr-May	12
T-ball (4 sessions): Apr-May	12

Elementary – Middle School: Grades K-7

Spring Crafts K-4 (6 sessions): Apr-May	14
Dodgeball Gr. K-4 (5 sessions): Apr-May	14
Tae Kwon Do K-4 (6 sessions): Apr-May	14
Field Trip to Grand Slam K-5: Mar 29	19
Teen Pickleball Clinic (1 session): Apr 4 – Fridley, 2 – SLP	6

Adult Fitness and Athletics

Zumba (2 classes/6 sessions each): Apr - May	17
Pickleball for Beginners (4 sessions): Feb-Mar 4 – Fridley; 4 - SLP	8
Pickleball Intro Clinic (1 session): Mar 30 6 – Fridley, 4 - SLP	10
Pickleball Ladder League – All Ages: Mar-May 23 – Fridley, 22 – SLP	45
Pickleball Ladder League – Ages 20-35: Mar-May 21 – Fridley, 0 – SLP	21
Volleyball Coed Rec League: Apr-May	7 teams
North Metro League*: Fridley-1 team, 2 individuals	
Volleyball Coed Competitive League: Apr-May	8 teams
North Metro League*: Fridley-1 team, 2 individuals	
Volleyball Women's Competitive League: Apr-May	9 teams
North Metro League*: Fridley – 1 team; 4 ind)	
Coed Bag Toss League: Feb-Apr	9 teams
North Metro League*: Fridley – 3 teams	

*North Metro Leagues are offered in cooperation with Mounds View, New Brighton, and Spring Lake Park.

Parks and Recreation Brochure

The May/June brochure is complete and is currently being mailed to residents.

April Facility Rentals

Facility Rentals

Moore Lake Community Building	5
Community Park	1
Ray Thompson Little League	54
Commons Park Ball Fields	36

Moore Lake Community Building

We had our first rentals of the new Moore Lake Community Building this month. Renters are given a key code to enter the building as well as a lock code to secure the building after use. The technology is working well and staff are figuring out the new workflows. For the first month we have had a facility monitor on-site to assist the renters. In addition to the rentals we have hosted a number of city staff meetings as well. The renters and staff have really enjoyed being able to host their meetings and events in this beautiful space!

Bag Toss League

The 7-week North Metro Bag Toss League ended in a single elimination tournament this month. The winner of the league was awarded a pair of North Metro League championship pint glasses. We are excited for the next session which will take place at Big Louie's Bar and Grill in New Brighton.

Spring Volleyball Leagues

Our North Metro Spring Volleyball Leagues began in April. Coed recreation and competitive leagues as well as a competitive women's league take place at Highview Middle School and the Mounds View Community Center. This will be our last indoor league before we move to the sand volleyball courts at Commons Park.

Pickleball for Beginners

The Pickleball for Beginners class began in April. This is our beginner level pickleball class where students learn the basic rules and technique of the sport. We will be moving outdoor and teaching classes at the new Moore Lake Pickleball courts in May!

Teen Pickleball Camp

This class is designed to give teens the opportunity to learn the basics of the fastest growing sport in the country. Our instructor Will Davison distributed free pickleball paddles to the participants through a grant he received through Rich Cat Supply Pickleball Gear!

Open Gym Participation

Family Open Gym at Hayes Elementary School concluded at the end of March. Running the months of November – March on Saturdays from 10:15 a.m. – 12:15 p.m. Cost of the programs was \$2 per child or \$4 per family, five visit punch cards can also be purchased for a reduced rate. Over the course of the winter 631 people participated in open gym. This is an increase of 200 participants from the 2022-23 open gym program. We are excited to see this program grow and look forward to offering it again next winter!

After-school Program

Our final after-school session of the school year started on April 16. We are offering Tae Kwon Do, Dodgeball, and Spring Crafts. Classes are 88% full and we look forward to a fun end of the school year!

Summer Staff Hiring

All Summer positions are filled! We have hired 2 summer interns who will start prep work in May. We have 12 returning seasonal staff (some will be working their 3rd summer with us!) and we hired 9 new seasonal staff. We look forward to getting to know these staff members at upcoming training sessions during the first week of June.

Summer Concerts

All musicians are booked and we are looking forward to a great summer of free, outdoor musical performances! We have a variety of locations and music for the community to enjoy.

- **Civic Campus:** We will have four concerts starting Tuesday, June 18 that will include food trucks and the Rec 'N Roll mobile. Musicians performing are: The Inland Seas, Dia Toti, Sawyer's Dream, and Socaholix.
- **Springbrook Nature Center:** Two concerts will take place on Tuesdays including musicians Southside Aces and Los Rebeldes.
- **Moore Lake:** We will have three concerts at Moore Lake on Mondays with Flamingo's Ice Cream present. Musicians include: Fridley City Band, Matt Hannah, and Jeff Loven.

- **Music in our Parks:** The Fridley City band will again tour Fridley parks and offer free Monday night performances at six parks (Flanery, Locke, Moore Lake, Madsen, Springbrook Nature Center, and Briardale.)

Vision Statement

We believe Fridley will be a safe, vibrant, friendly and stable home for families and businesses.

Memorandum

Item 7.

Date: 5/1/2024
To: Mike Maher, Parks and Recreation Director
From: Jeff Jensen, Operations Manager, Streets, Parks, Facilities
DEPT: Public Works
CC: Margo Numedahl, Parks and Recreation Manager
RE: Parks and Recreation Commission Report for May 6th, 2024 Meeting

The Park Maintenance Division has been working at Moore Lake with placing all amenities, making concrete forms for benches and garbage, getting all nets up, replacing volleyball court borders, cleaning building, and trimming trees.

We have been working in all parks with winter debris clean-up, athletic nets, seeding and summer prep. We have had our first tournament at Community Park, and we are also prepping athletic fields every day.

Three seasonal employees have started, and we are looking for approximately twenty more to be starting in May and first week of June to help with our busy summer season.
